ABOUT ME

I am an experienced full-stack developer skilled at building fast, modern **websites** and **mobile apps**. I enjoy both frontend and backend work, love learning new technologies, tackle challenges, manage my time well and focus on quality. I am eager to find opportunities where I can grow, help businesses succeed, and create products that make a real difference.

EDUCATION

2022-present

- **BAHIR DAR UNIVERSITY**
  Software Engineering

2022-2023

- **COURSERA**
  Web Development Courses

SKILLS

- **Frontend**
  JavaScript , TypeScript , React , Redux, Tailwind CSS , Next.js
- **Backend**
  Node.js , Express.js , JWT, RESTful APIs ,GraphQL , WebSockets
- **Mobile Application**
  Flutter
- **Databases**
  MongoDB,PostgreSQL,Firestore, Cloudinary

EXPERIENCE

CURRENTLY

- **The Tann Mann Foundation**

  Working remotely as a Flutter developer, contributing to the development, and deployment of mobile application. Focused on creating seamless, user-friendly experiences by implementing responsive interfaces and efficient functionality. Involved in collaborating with cross-functional teams, troubleshooting issues, and continuously improving app performance to meet user needs and business goals.

3 MONTHS INTERNSHIP

- **Alyah Software Development PLC**

  Worked onsite as a full-stack developer to build a donation platform using MongoDB, Express.js, React, and Node.js. The platform includes secure payment processing and comprehensive donor management features, ensuring a reliable and user-friendly experience for both donors and administrators. Collaborated closely with cross-functional teams to gather requirements and deliver robust functionality. Continuously maintained and optimized the platform for performance and scalability to support growing user demand.

1-MONTH REMOTE INTERNSHIP

- **Prodigy InfoTech**

  Developed several mini full-stack web applications utilizing MongoDB, Express.js, React, and Node.js and other technologies.

3+ YEARS

- **Personal Projects**

  I have developed numerous personal projects using a variety of technologies to enhance my technical skills and knowledge. Additionally, I have worked on projects for clients, applying my expertise to deliver effective solutions while continuing to grow professionally.

PROJECTS

- **BruhAI:** Platform that lets users interact with multiple AI models in one place, without switching platforms. It offers a smooth, efficient experience by combining various AI services into a single interface. Built with modern technologies like Next.js for the frontend, Express.js for the backend, and PostgreSQL for the database, it ensures reliability and scalability.

- **Gursha Flavors:** A restaurant mobile app developed with Flutter that offers a detailed listing of food and drink items, advanced filtering to help users quickly find what they want, integrated maps for location-based delivery and tracking, and seamless payment options for secure transactions.

- **Tesfa Aid:** A donation platform that enables users to donate for people in need, featuring integrated secure payment systems to ensure smooth and reliable transactions. Built using the MERN stack (MongoDB, Express.js, React, Node.js), this platform provides a safe and user-friendly way to support individuals directly.

- **Roha Picks:** a modern and easy-to-use movie recommendation website. It helps find the best movies to watch, lets users watch trailers, see movie details, and add movies to favorites. users can also explore trending and popular movies. Soon, users will be able to post their own movie-related content. The platform has a strong backend powered by RESTful and GraphQL APIs to keep everything running smoothly.

- **planWise** : a notes application that allows users to create, edit, delete, and organize their notes through a clean and responsive user interface. Built using the MERN stack (MongoDB, Express.js, React, and Node.js), .
