ABOUT ME

I am an experienced full-stack developer skilled at building fast, modern **websites** and **mobile apps**. I enjoy both frontend and backend work, love learning new technologies, tackle challenges, manage my time well and focus on quality. I am eager to find opportunities where I can grow, help businesses succeed, and create products that make a real difference.

EDUCATION

2022-present

- **BAHIR DAR UNIVERSITY**
  Software Engineering

2022-2023

- **COURSERA**
  Web Development Courses

SKILLS

- **Frontend Development**
  HTML , CSS , JavaScript , TypeScript , React , Redux , Tailwind CSS , Next.js
- **Backend Development**
  Node.js , Express.js , JWT, RESTful APIs , WebSockets
- **Mobile Application Development**
  Flutter
- **Databases**
  MongoDB,PostgreSQL,Firestore, Cloudinary
- **Other tools and technologies**
  Git,Github,Postman,Docker

EXPERIENCE

3-MONTHS INTERNSHIP

- **Alyah Software Development PLC**
  Developed a full-stack donation platform using MongoDB, Express.js, React, and Node.js (MERN stack)

1-MONTH REMOTE INTERNSHIP

- **Prodigy InfoTech**
  Built multiple full-stack web applications using MongoDB, Express.js, React, and Node.js.

3+ YEARS

- **Personal Projects**
  I've developed numerous personal projects using various technologies to expand my technical knowledge and skills

PROJECTS

- **Bruh Ai :** Chat-based web application that fetches AI-generated responses from the Gemini API. Developed using React.js for the frontend, styled with Bootstrap, with a Node.js backend, and MongoDB for storing user interactions.
- **Bruh Picks :** Full-stack movie recommendation website using MERN stack. The platform fetches movie data from the TMDB API and features a custom-built admin dashboard for managing movies and users.
- **Tesfa Aid :** A donation platform that enables users to contribute directly to individuals, featuring integrated secure payment systems to ensure smooth and reliable transactions. Built using the MERN stack (MongoDB, Express.js, React, Node.js)
- **planWise** : A notes application that allows users to create, edit, delete, and organize their notes through a clean and responsive user interface. Built using the MERN stack (MongoDB, Express.js, React, and Node.js), .
- **Juice House :** A modern and responsive landing page for a juice house, developed with React.js. The design emphasizes a clean and visually appealing user interface, delivering a seamless user experience through reusable components and optimized performance for fast loading and smooth interactions.
